## MARKET STALL HOLDERS INFO

EGA09 is a four day outdoor conference made up of lectures, workshops, panel discussions, a market space, cinema, performance, art and a drop of sound. Around 500+ people will attend the conference and be living on site for the duration of the event. This offers a very unique opportunity for market stalls, as people of all ages travel from all around Australia to attend. For many attendees this is the main event on their calendar and they expect to take new and special things home with them. The market stall space is very large, and stalls holders are encouraged to have fun and create funky sale spaces.

## **Power Details** (this is very important, read and respond carefully)

### **General Stall Holders**

We have allocated each general EGA stall space approximately 400 Watts each, that will be available 24/7. This is enough power for approximately 2 desk lamps, 4 fluoro tubes, two sets of fairy lights and 1 CD player. However you must bring along one 20m power lead and all your own power boards and lighting for your stall.

### **Food Stall Holders**

If you require more power than what is stated above for general stall holders, you must state what you need it for, and how much additional power will be required. Please be very specific. We are only going to be able to accommodate food stalls on this power extension.

How much more power do you require power? For what purpose? Please also list the appliances which you need to run, to give us an indication of your power consumption needs.
